

PUGMCO

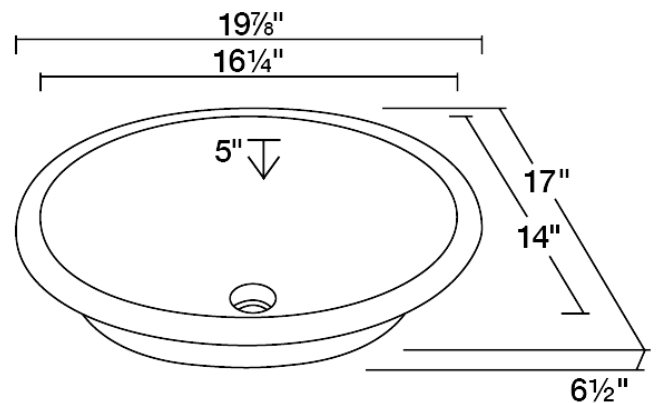

Undermount Glass Bathroom Sink

The PUGMCO Colored Glass Undermount Sink is created of fully tempered glass, which means it can withstand higher temperatures without incurring damage. Because it is non-porous, glass is also one of the most sanitary materials available in sink designs. This glass model provides the beauty of glass, usually seen only in vessel sinks, in an under-the-counter installation. Undermounting a bathroom sink creates a sleek look and allows for more space on your countertop. A red, frosted surface gives this model a soft appearance. The overall dimensions of the PUGMCO are 19 7/8" x 17" x 6 1/2" and requires a 21" minimum cabinet width. Grid drains in a variety of finishes are available with this sink model, and as always, our glass sinks are covered under a limited lifetime warranty for as long as you own the sink.
